Spectro suit: Lesar phoned yesterday to tell me that the court of appeals has reconsidered and is going to hear additional arguments in its en banc rehearing. It is also lumping with this solid suit the dubious one by the CTIA, for copies of the Sirhan FBI reports. The new hearing will be 7/11 (let us be superstitious!). This is but another example of the potential for harm from the publicity-seekers who do no real work, seek cheap "success" and can't distinguish the worthwhile from the trivial. Especially with Nixon control of the Supreme Court is it irresponsible to file any suit that the DJ can rush to ajudication in order to select those it prefers to be precedent. In this case, Bud will be arguing both suits. He has a vested, personal interest in one, the weaker. HW 6/9/73
